

## November 2021

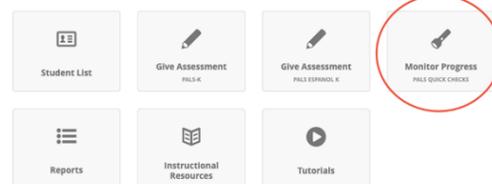

### November News

- November is the final month for collecting fall data within the recommended screening window for most students. It's also a good time to dig deeper into the data you've collected, to evaluate what resources you have available for instruction and intervention, and to consolidate teams of support for each student's learning.
- You don't have to wait until Mid-Year to find out whether instruction is working! Read about the [PALS Quick Checks](#), which can be used to monitor progress approximately every two weeks.
  - Look for the **Monitor Progress: PALS Quick Checks** tile on your Teacher Home Page.
  - Premier clients can visit the PALS Professional Development site to view the recording of October's webinar, "Addressing Learning Loss with PALS Quick Checks."
- **Wisconsin districts:** Remember that if you use [eduCLIMBER](#), your PALS assessment data is now automatically uploaded nightly into the eduCLIMBER

dashboard, precluding the need for any manual upload. Viewing your PALS data within the context of a whole-child view is now easier than ever!

- If you have student records still marked as “NSR” (Nonstandard Remote Administration) from last year and need information about what this means or how to change it, [visit this page for more information](#).
- If you need to reach our PALS team for any reason, your best bet is by email at [support@palshelp.com](mailto:support@palshelp.com). *Please remember to include in your email: your name, your role, the name of your district, and a detailed description of your question or needs.*
